PROFESSIONAL SUMMARY

B.S. in Industrial Management and Technology with enterprise help-desk, remote application-support, and IT field-service experience. Troubleshot Windows systems and connected devices, documented incidents and process steps, and worked directly with employees and customers. Seeking remote IT operations, desktop support, or technical support roles; completed historical safety coursework at NIU (TECH 231).

DESKTOP AND OPERATIONS SKILLS

Desktop support: Windows workstations; Microsoft 365; peripherals/printers; basic connectivity and account issues
Service delivery: Tier 1 incident handling; ticket history; escalation; user instructions; phone/chat/email support
Operational discipline: Work instructions; quality and accuracy checks; site safety; shift handoffs; prioritization
Tools: Ticket/CRM workflows; Microsoft Excel/Word; CAD drawing interpretation (coursework)

PROFESSIONAL EXPERIENCE

Client Support Specialist | SmartRent, Inc. | Remote

August 2021 – December 2023

- Resolved connected-property technology problems involving smart devices, account access and mobile apps through multichannel support.
- Verified Wi-Fi and pairing conditions with customers and documented the steps that produced or failed to reproduce an issue.
- Communicated clear case summaries to specialist teams, supporting investigation of unresolved hardware or software behavior.
- Drafted or updated recurring issue notes and user instructions for consistent follow-up.

PC Technician | Robert Half Technology | Temporary Client Assignments

2019

- Completed temporary PC Technician assignments through Robert Half Technology, including placements with Innervision Technology Relocation and Pro4ia Inc.
- Supported client-site IT field service and technology relocation projects.
- Worked in temporary, project-based technical environments requiring on-site coordination and adherence to client procedures.

Help Desk Specialist | NSC Global | Grant Thornton Contract

2018 | Contract assignment

- Troubleshot corporate desktop hardware, user access, printers and basic office application issues during an enterprise contract assignment.
- Documented troubleshooting steps and ticket outcomes to give coworkers visibility into open issues and escalation needs.
- Guided end users through workstation and peripheral checks, translating technical steps into practical instructions.
- Coordinated escalations for issues outside Tier 1 support scope, preserving context in written case notes.

ADDITIONAL OPERATIONS EXPERIENCE

Production / Quality Support | Greif Manufacturing | Staffmark

2014–2015

- Supported industrial packaging and steel-drum production by following equipment and work-quality instructions.
- Checked observable product or process conditions and reported concerns to site personnel in an industrial environment.

Warehouse / Site Associate | Wonolo / LSG Sky Chefs

On-demand assignments

- Prepared or staged materials to shift work instructions in warehouse and airline-catering operations.
- Followed site-specific handling procedures and order requirements to support timely work completion.

Construction Project Documentation | Batiste Interior Professionals

Project-based | Documented activity 2021–2026

- Exchanged garage elevation packages, corrected dimensions and project documentation with company contacts.
- Prepared organized bid scopes and revisions for residential renovation, deck/gate and shower-door proposals.

ACADEMIC TECHNICAL WORK

- NIU structural-damage research (2012–2013): recorded testing methods and observations using vibration/frequency response, ultrasonic inspection and infrared thermography concepts.
- CAD coursework (2013–2014): generated dimensioned SolidWorks technical sheets with title blocks, orthographic views and part notes.

AI-ASSISTED SOFTWARE DEVELOPMENT & AUTOMATION

- Apply generative AI to prototype software features, build repeatable workflows, analyze technical problems and draft documentation.
- Familiar with AI-assisted application development, UI design, APIs, prompt engineering, automation, code review and iterative testing.

EDUCATION

Bachelor of Science, Industrial Management and Technology | Northern Illinois University, DeKalb, IL | December 2014

TRAINING AND SOFTWARE

Safety Training (NIU TECH 231); historical general-industry and construction OSHA 10/30 training noted in older records (2012–2013). Windows; Microsoft Office/Excel; ticket documentation; SolidWorks (coursework); AutoCAD (basic); Creo (basic).

Selected technical and employment history | Resume updated October 2026
