PROFESSIONAL SUMMARY

B.S. in Industrial Management and Technology with personally credited construction bid documents for residential and property-management clients. Prepared proposal scopes, cost breakdowns and revisions, including deck/gate, shower-door and kitchen-renovation work through a family business. Seeking construction estimator or project coordinator positions; trained in historical NIU safety coursework (TECH 231).

ESTIMATING AND DOCUMENTATION SKILLS

Preconstruction Project scopes; labor/material allowances; permit/fee line items; deposit and balance schedules

Coordination Client document revisions; signature routing; drawing packages; project-related correspondence

Drawing tools Dimension/elevation interpretation; SolidWorks (coursework); AutoCAD (basic/coursework)

Technical Microsoft Office/Excel; technical writing; construction material and finish descriptions

RELEVANT CONSTRUCTION EXPERIENCE

Construction Estimating and Project Support | Batiste Interior Professionals

Family business, South Holland, IL | Project-based evidence 2021–2026

- Prepared a September 2023 shower-door proposal identifying $750 in base labor and a separate potential tile-damage cost, clarifying the customer-facing scope.
- Prepared a 2023 deck-and-gate bid crediting Matthew Phillips as preparer and separating $7,091 deck work from $4,785 gate repair and cleaning.
- Organized treated-lumber materials, handrail requirements, cleaning/resealing tasks and other scope details into a clear property-management proposal.
- Revised a February 2026 kitchen proposal totaling $28,746, distinguishing work categories across finishes, cabinetry, electrical, plumbing and floors.
- Communicated directly with the kitchen customer to correct the proposal date and signature information and reissue bid documents.
- Exchanged project files and garage/shed drawing references with company contacts for use in scope and document coordination.

REPRESENTATIVE PRECONSTRUCTION WORK

Condominium Deck and Gate Bid | Dolton, Illinois

October 2023 | Proposal only

- Documented proposed deck support, treated-lumber features, handrails and gate repairs in an itemized scope for property management.
- Presented $7,091 deck and $4,785 gate proposal components, preserving a clear separation of the two work packages.

Kitchen Renovation Bid | Chicago-area Residential Client

February 2026 | Proposal only

- Structured a $28,746 multi-trade proposal with categories including cabinets, flooring, drywall, plumbing, electrical and finishes.
- Resolved requested corrections to the customer-facing contract file and transmitted amended signed documents by email.

Construction Drawings and Detail Coordination | Selected Family-Business Projects

2021–2023 | Collaborative project correspondence

- Reviewed and exchanged residential shed/garage elevation drawings containing dimensions and construction notes.
- Used drawing and scope information to support technical records; independent architectural plan authorship is not claimed.

RELATED EXPERIENCE

Production / Quality Support | Greif Manufacturing | Staffmark

2014–2015

- Applied manufacturing work instructions and observed quality expectations in an industrial packaging production setting.
- NIU mechanical CAD (2013–2014): authored SolidWorks component sheets; three credited drawings appear in the accompanying portfolio.

Paid Petition Circulator / Field Campaign Specialist | Direct Democracy Unlimited

Political campaign assignments

- Collected approximately 100 petition signatures per day during political campaign assignments and became a top-performing petition circulator.
- Conducted face-to-face outreach, explained petition purposes and requirements, answered questions, and kept organized signature records while working independently to campaign deadlines.

AI-ASSISTED APPLICATIONS & WORKFLOW AUTOMATION

- Use generative AI to prototype apps and programs, organize technical requirements, refine documentation and explore workflow automation.
- Familiar with AI-assisted software development, UI design, APIs, prompt engineering and iterative debugging; verify results before use.

EDUCATION

B.S., Industrial Management and Technology | Northern Illinois University | December 2014

SAFETY AND DESIGN TRAINING

Safety Training (NIU TECH 231); CAD (NIU TECH 211); SolidWorks mechanical drafting coursework; basic AutoCAD and Creo. OSHA training noted historically (2012–2013); no current OSHA professional certification claimed.

Attached project samples: control block and mechanical part drawings, individually credited and dimensioned. Financial figures above are proposed bid values, not awarded project revenue.
