PROFESSIONAL SUMMARY

B.S. in Industrial Management and Technology with remote application-support and enterprise help-desk experience. Resolved customer issues involving smart-home devices, user access, connectivity, and Windows workstations; documented findings for escalations and reusable support articles. Seeking remote IT support or customer technology-support roles; completed historical safety coursework at NIU (TECH 231).

CORE TECHNICAL SKILLS

Support Tier 1 incident triage; phone, chat and email assistance; case notes; escalation; customer training

Systems Windows; Microsoft 365; mobile apps; login/account access; Wi-Fi and device pairing

Documentation Troubleshooting steps; SOPs; knowledge articles; status updates; quality-focused follow-up

Tools Support-ticket/CRM workflows; Microsoft Excel, Word and Outlook (prior work experience)

RELEVANT EMPLOYMENT

Client Support Specialist | SmartRent, Inc. | Remote

August 2021 – December 2023

- Resolved resident and property-management questions about smart-home software and connected devices through phone, chat and email, helping users recover basic functionality.
- Diagnosed device pairing, Wi-Fi connectivity, mobile-app behavior and account permissions by gathering symptoms and walking customers through reproducible checks.
- Documented observed faults, actions attempted and outcomes in case records, enabling specialist teams to continue unresolved investigations.
- Explained technical processes in plain language to nontechnical users and provided follow-up instructions for recurring support needs.
- Contributed troubleshooting notes and process guidance for common problems, improving the consistency of team handoffs.

Help Desk Specialist | NSC Global | Grant Thornton Contract

2018 | Contract assignment

- Assisted employees with first-level Windows workstation, office software, login, peripheral and printer issues.
- Recorded symptoms, checks and outstanding questions in enterprise help-desk tickets to support escalations and follow-through.
- Walked users through basic desktop setup and connectivity checks, restoring normal workflows when issues were resolved at first contact.

ADDITIONAL RELEVANT EXPERIENCE

Project Documentation & Customer Communication | Batiste Interior Professionals

Project-based family-business work | Documented activity 2021–2026

- Prepared and revised customer-facing construction bids, providing clearly organized scope descriptions, terms and cost information for review.
- Corrected contract dates and signatures during February 2026 customer correspondence and reissued revised documents for approval.
- Organized drawing packages and exchanged construction-related documents with company contacts, maintaining usable project records.

Warehouse / Production Assignments | Wonolo / LSG Sky Chefs

On-demand assignments

- Followed site instructions for staging and preparing time-sensitive products in warehouse and catering operations.
- Used order specifications and required work procedures to support accurate handoff of materials between shifts.

Paid Petition Circulator / Field Campaign Specialist | Direct Democracy Unlimited

Political campaign assignments

- Worked to a standard daily goal of approximately 100 petition signatures during political campaign assignments.
- Conducted face-to-face outreach, explained petition purposes and requirements, answered questions, and kept organized signature records while working independently to campaign deadlines.

TRANSFERABLE TECHNICAL PROJECTS

- NIU engineering research (2012–2013): documented a three-person academic investigation of aluminum-beam damage detection using vibration, infrared and ultrasonic approaches.
- Technical drawing archive (2013–2014): retained individually credited SolidWorks drawings that demonstrate clear annotations, dimensions and revision information.

AI-ASSISTED SOFTWARE DEVELOPMENT & AUTOMATION

- Use generative AI tools to translate product ideas into app specifications, draft and revise code, troubleshoot errors, and test workflows.
- Familiar with AI-assisted web/mobile app development, prompt engineering, user interfaces, APIs, automation and iterative debugging; independently validate generated outputs.

EDUCATION

Bachelor of Science, Industrial Management and Technology | Northern Illinois University, DeKalb, IL | December 2014

ADDITIONAL TRAINING

Safety Training (NIU TECH 231) | Historical academic coursework, not an active OSHA certification.

Technical skills: Microsoft Office; issue documentation; customer communications; case prioritization; basic CAD drawing interpretation.
